SIGN – IN / SIGN – OUT

HE SIGN

- Sign in to Amadeus from the original Sign-In window

Graphical display – GUI

Insert the personal data of the Agent Sign <4 digits and 2 letters> in the relevant field. Always use **SU** as a duty code in the third field and fill in the password (5-8 alphanumeric characters)

- Click on to enter the **Production Mode**.

💡 Sign in to Amadeus using the below entries on the **Command Page**

JI 0001 AA / SU - XXXXX

JI - action code - **Jump In / Production**

0001 AA Personal Agent Sign details
(4 digits and 2 letters)

/SU duty code
- XXXXX password (5-8 characters)

JO

JO - action code – **Jump Out**
Sign out of Amadeus

JJ 0001 AA / SU - XXXXX

JJ - action code - **Jump / Training**

0001 AA Personal Agent Sign details
(4 digits and 2 letters)

/SU duty code
-XXXXX password
(5-8 alphanumeric characters)

2.

GENERAL INFORMATION

HE ENCODE / DECODE

 ENCODING - DECODING

Ability to encode and decode cities, airports, countries, airlines and aircraft types

❖ Cities - Airports

DAN ATHENS
DB LISBON

action code – **D**isplay **A**ll by **N**ame
encode by name of city or airport

DAC JFK
DB ORY

action code – **D**isplay **A**ll by **C**ode
decode a three-letter code of a city or airport

DAN MO*/UY

encoding a city using the first letters and the country code in which it belongs eg. Montevideo in Uruguay

DAN PARIS /N
DAC PAR/N

/ N – nearest ten airports
display the ten airports closest to the city or airport

❖ Country

DC GREECE
DC GB

action code – **D**on't **k**now **C**ountry
encoding / decoding a Country

*** additional info like currency and nationality ***

DNS USNY

action code – **D**on't **k**Now **S**tate
decoding country & state eg. US –NY

❖ Airlines

DNA ALITALIA
DNA BA

action code – **D**on't **k**Now **A**irline
encoding / decoding Airlines

❖ Aircraft types

DNE AIRBUS
DNE 717

action code – **D**on't **k**Now **E**quipment
encoding / decoding Aircraft types

 [GG PAGES](#)

Informative Pages in Amadeus system, providing info such as:

| | |
|----------------------|--|
| GG AIR LH | general information for airlines eg. LH |
| GG AIR LH ATH | general information for airlines in a specific city eg. LH in Athens |
| GG APT LHR | general information for an airport eg. LHR |
| GG COU FR | general information for countries eg. FR |
| GG WEA LIS | weather information for a specific city e.g LIS |
| GG PCA A3 | information on participating carriers e.g A3 |

 [TIME DIFFERENCES](#)

HE DD

| | |
|-----------------------|--|
| DD ATH / FRA | display the time difference between ATH & FRA |
| DD FRA | local time in FRA and time difference with ATH as per system default |
| DD BKK1300/LON | display local time in LON when the time in BKK is 13:00 |

 [CALCULATOR](#)

HE DF

| | |
|---------------------------|--|
| DF 150.89 ; 145.56 | calculator – Addition |
| DF 145.89 - 89.78 | calculator – Subtraction |
| DF 145.21 * 14.21 | calculator - Multiply |
| DF 1500 / 56 | calculator - Divide |
| DF 1500.00 P 15 | calculator – Plus/minus percentage 15% |

HE DM

MINIMUM CONNECTING TIME

Minimum connecting time required between connection flights at an airport or city.

Check when PNR is not displayed:

DM NYC

DM ORY- CDG

minimum connecting time in NYC

minimum connecting time between two airports in the same city

Check when PNR is displayed:

DMI

DMI 8/9

check connections for the entire PNR

check specific segments in a PNR

HE DRT

CONNECTION POINTS

Possible connecting points of a route

DRT ATHSYD

DRT ATHSYD/AAF

list of routes with its connecting points

list of routes and connecting points with a specific carrier

HE TIMATIC

TIMATIC

Electronic form of TIM available on system including information regarding Visa, Health, Passport, Customs etc of the city/country visited:

TI FV

Timatic for Visa

TI FH

Timatic for Health

TI FA

Timatic information for All

>TIRV
NA
AR
DE
TR
NA- PASSENGER'S NATIONALITY. ADD /SEMN IN CASE OF SEAMAN
ADD /TYPE FOR OTHER THAN NORMAL PASSPORTS
AR- ALIEN RESIDENTS
DE- DESTINATION POINTS
TR- TRANSIT POINTS VIA OTHER COUNTRIES

 AUSTRALIAN VISA APPLICATION

Fill in the three following tables with the required passport data, for an automated electronic visa issuance for Australia:

TIETAR
SYSTEM RESPONSE - SCREEN 1:

```
>TIETAA      ETA APPLICATION
PASSPORT NUMBER ..... FROM PASSPORT TITLE PAGE
NATIONALITY ... 1-3 CHARACTER CODE
DATE OF BIRTH ..... DDMONYYYY--MONYYYY----YYYY
SEX ..... M/F
COUNTRY OF BIRTH ... 1-3 CHARACTER CODE
EXPIRY DATE ..... DDMONYYYY
FAMILY NAME ..... FULL NAMES-NO TITLES
GIVEN NAMES ..... SPACE BETWEEN NAMES
TYPE OF TRAVEL .. V/BL/BS
```

```
>TIETAG      ETA APPLICATION
ISSUING STATE ... DATE OF ISSUE ..... DDMONYYYY
ISSUING AUTHORITY
```

```
DOES APPLICANT HOLD CITIZENSHIP OF OTHER COUNTRIES . Y/N
IF YES ENTER CODES OF OTHER COUNTRIES ... ...
HOME .....
ADDRESS OF .....
APPLICANT .....
TELEPHONE HOME COUNTRY .... AREA .... NUMBER .....
OF .... BUS COUNTRY .... AREA .... NUMBER .....
APPLICANT MOB COUNTRY .... NUMBER .....
EMAIL OF APPLICANT .....
ERROR (5051): MORE INPUT LINES EXPECTED.
```

SYSTEM RESPONSE - SCREEN 3:

```
>TIETAP      ETA APPLICATION
RE-ENTER TO VALIDATE PASSPORT DETAILS
DETAILS MUST MATCH PREVIOUS SCREEN

PASSPORT NUMBER ..... FROM PASSPORT
NATIONALITY ... 1-3 CHARACTER
FAMILY NAME .....
FIRST GIVEN NAME .....
SECOND GIVEN NAME .....
OTHER GIVEN NAME(S) .....
```

After filing in the last table, the system provides the following basic information:

- DATE AND TIME IT WAS PROCESSED (Top right of the screen)
- VALIDITY OF THE ETA (In the entry status field)
- WORDS ""**ETA APPROVED**"" (Bottom left of screen)

 [Amadeus online HELP pages](#)

Using the **HELP** function in Amadeus, you can get “online help” for miscellaneous chapters and commands in the system.

HE STEPS

“Help” from the system / step-by-step

System response:

| FOR INFORMATION ABOUT: | ENTER: | FOR INFORMATION ABOUT: | ENTER: |
|--|------------------|--|--|

| FARES: | | | |

HE FARES

“online help” on FARES

HE GROUPS

“online help” on issues relating to GROUPS

HE CLAIM

“online help” on CLAIM procedures

HE NM

“online help” on NAMES elements

HE /

“online help” on the last command entered

3.**AIR - AVAILABILITY DISPLAY**

HE AN

 Availability Neutral Request

Availability of flights and available seats for a specific city pair, date and airline.

Amadeus Neutral Availability displays the flights with classes of service that are open for sale or waitlist (A – L – R)

Amadeus displays impartially the Availability regardless the airline, according to the following logical principles:

- .1. Direct flights non-stop, by Departure Time
- .2. Direct flights with stop(s), by Elapsed flight Time
- .3. Connecting flights, by Elapsed flight time

Explanation:

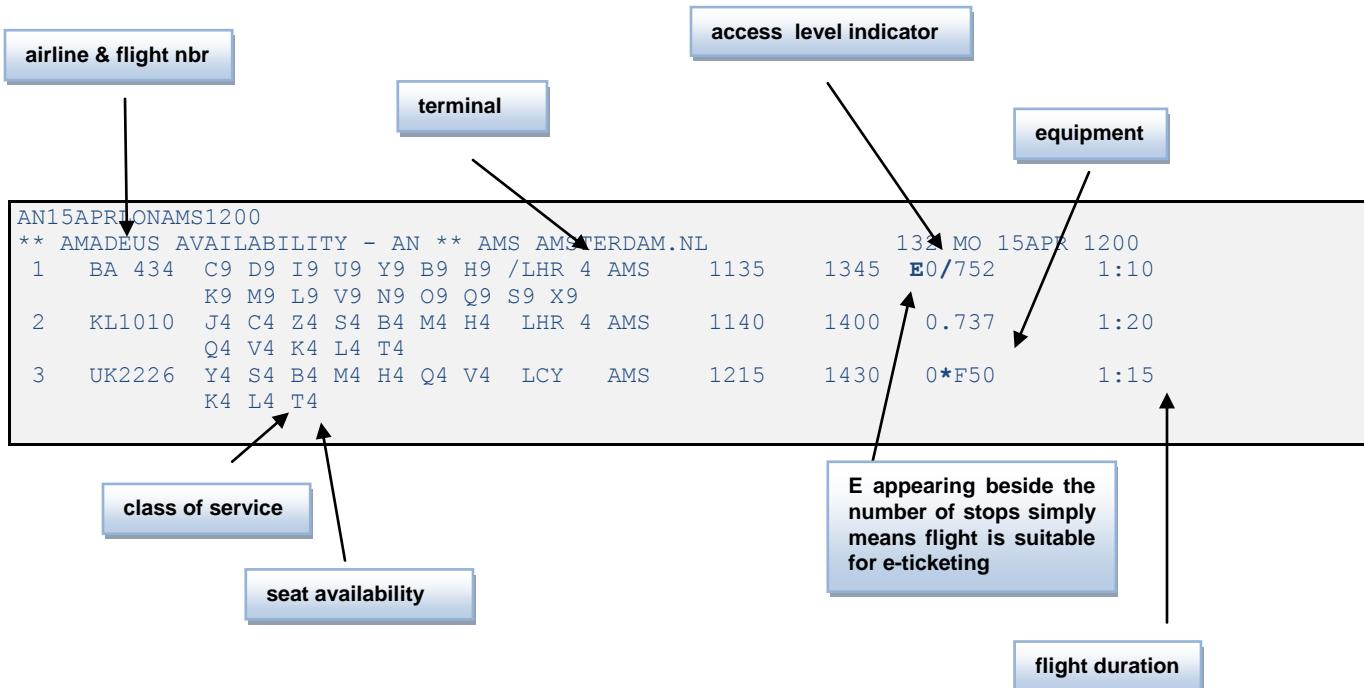

| | | |
|----------------------|-------|-----------|
| AN | 18SEP | ATHLON |
| Availability Neutral | date | city pair |

- If the departure point is the city where your terminal is registered and the departure date is for today then the basic entry can be limited to:

| | |
|---|--|
| ANLON | Avail. Neutral from ATH to LON today |
| AN18SEPATHLON/A OA | for specific airline |
| ➤ <u>Additional options on Availability request :</u> | |
| AN18SEPATHLON/A OA, LH, IB | up to 3 different airlines |
| AN22SEPATHBKK/X FRA | via a specific connection point |
| AN /15SEPATHSKG/AOA | search for availability up to 7 days after the departure date |
| AN /15SEPATHSKG/C X | search for availability up to 7 days after the departure date for a specific <u>class of service</u> (J,D,Y,K,X etc) |
| AN11JULMADATH/K F | search for availability for a specific <u>cabin type</u> (F,C,Y) |
| AN11AUGATHPRG/B 4 | search for availability for a specific number of seats |
| AN20AUGATHSKG 1900 | search by departure type |
| AN11SEPATHMIL /FN | direct flights Only |
| AN15OCTATHSIN /O | On-line connections only |

- Combine the additional options to narrow down your search results in an availability display :

AN18SEPATHLON/A OA/X SKG
AN / 20OCTATHCHQ/A A3/C V
AN1JUNLONJFK/A BA/K C/B 3
AN15OCTATHSIN /ATG /O

■ Alpha & Numeric Seat Availability

| | | |
|---|------------|-------|
| A | Available | 1 – 9 |
| L | Waitlist | 0 |
| R | On Request | R |
| S | Suspended | S |
| C | Closed | C |
| X | Cancelled | X |

■ AMADEUS ACCESS LEVELS

Access Levels between airlines and Amadeus:

| Availability Symbol | Confirmed ? | PNR Segment Status | PNR Guarantee indicator |
|-------------------------|-------------|---------------------------|-------------------------|
| / Amadeus Access | 0/747 | Immediately | *1A/ |
| . Amadeus Access Sell | 0.747 | Immediately | *1A/ |
| * Direct Access | 0*747 | When booked Direct Access | * AI * (airline code) |
| : Amadeus Access Update | 0:747 | After 12 hours | SS changes to HK |
| Blank Standard Access | 0 747 | After 12 hours | SS changes to HK |
| T Ticketless | T 0 319 | GGAIRYY | SS |
| | | | blank |

DUAL AVAILABILITY DISPLAY

Simultaneous display of availability for two different city pairs. Use the Dual Availability, either for a return trip or for consecutive city pairs:

AN20NOVATHLON/ABA * 30NOV

➤ Additional options :

AN20NOVATHLON/ABA*30NOV

availability from ATH to LON on 20NOV returning (from LON to ATH) on 30NOV with British Airways.

AN22DECATHFRA*25DECFRAAMS

availability from ATH to FRA on 22DEC and from FRA to AMS on 25DEC

AN22DECATHFRA*FRAMUC1900

availability from ATH to FRA on 22DEC and on the same day, from FRA to MUC with departure time around 1900

 **CHANGING AVAILABILITY DISPLAY – ‘AC’ ENTRIES**

Change the Availability display with short and smart entries, WITHOUT repeating the primary entry

ACR

action code – **A**vailability **C**hange **R**eturn
change of the previous AN for a return trip,
by reversing the routing on the same date R
(Return)

eg. If the previous availability was ATHLON for 18SEP, the new availability will be for LONATH on the same date 18SEP.

ACR22SEP

change of the previous AN to a return trip
on a different date

AC5

change of the previous AN for 5 days later

AC23SEP

change of the previous AN for a specific
date

AC-2

change of the previous AN for 2 days earlier

AC/ABA

change of the airline

AC/XZRH

change of connecting point

AC/SKG

change of departure city

AC//PAR

change of destination city

HE DIR xx

DIRECT ACCESS availability display

Flights and seat availability "directly" from the airlines' reservation system.

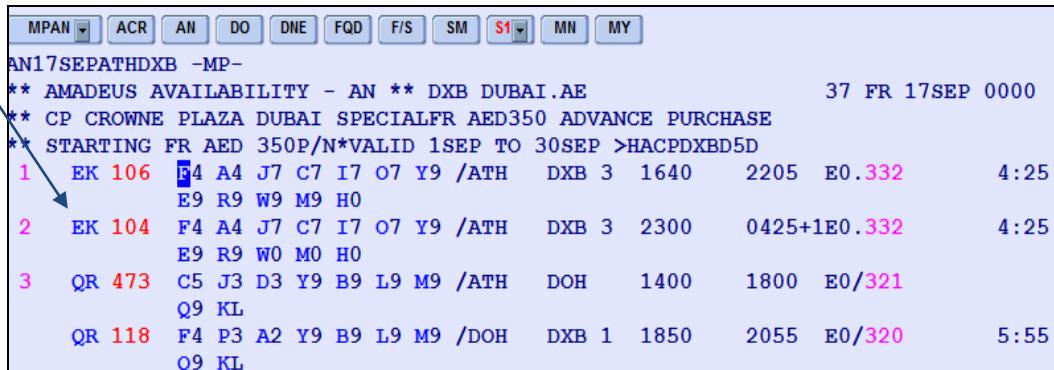

If an airline supports *Direct Access* (*) level ,it is necessary to access the airlines' system directly, when making a reservation, in order to get reliable information and immediate confirmation.

If an airline supports *Amadeus Sell Access* (.) level,it is optional to access the airlines' system, when making a reservation, in order to get reliable information and immediate confirmation.

You may request Direct Access availability, using one of the three following methods:

❖ 1st Method

After requesting an AN display, enter the airlines' system by double-clicking on its 2 letter code on the availability line

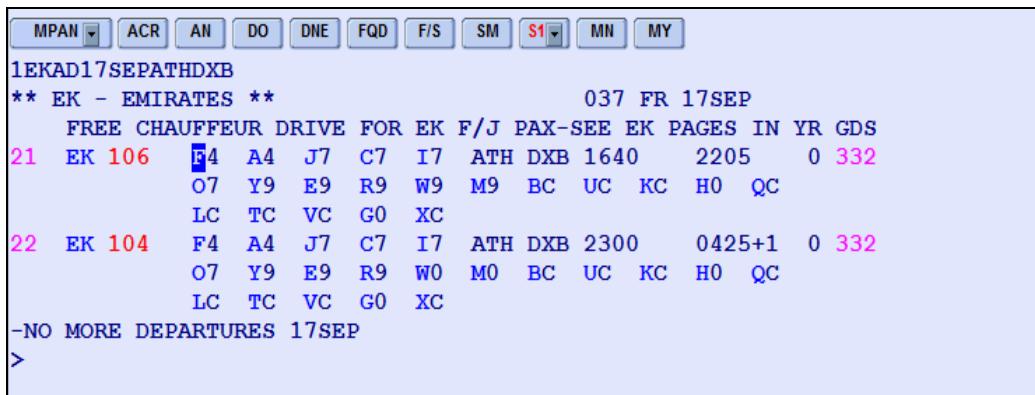

```

AN17SEPATHDXB -MP-

| | | | W7 | R7 | G0 | | | | | |

❖ **3rd Method**

If you know that the airline you wish to access supports Direct Access display, the long sell entry may also be used:

10AAD23MARATHPAR

explanation:

| | | | | | |
|---|---------|---------|-----------------|-------|-----------|
| 1 | Command | OA | AD availability | 23MAR | ATHPAR |
| | | Airline | direct | date | city pair |

 **AVAILABILITY CHANGE DISPLAY FROM DIRECT ACCESS AVAILABILITY**

From a Direct access Availability, you may change the display by using the short and quick entries, similar to AC entries

1 AZ /

change from a Direct Access airline to another Direct Access airline eg.from OA to AZ

1OA AC25MAR

change of display to a new date

1OA ACR

change the previous display to a return itinerary on the same date

1AZ ACR28MAR

change the previous display to a return itinerary on a different date

 **SCROLLING ENTRIES in Direct Access**

The same scrolling entries apply, with the difference that you have to use the direct access prefix before the command

6.

SAVE - CANCEL - RECALL A PNR

Save

| | |
|-----------|--|
| ET | End of Transaction – save changes and /or updates in pnr |
| ER | End of Transaction & Redisplay pnr |
| IG | Ignore |
| IR | Ignore & Redisplay |

Cancel

| | |
|---------------------|---|
| XE 5 | cancel a specific element in a pnr e.g. element nbr 5 |
| XE 5 , 8 - 9 | cancel elements : 5 and 8 to 9 |
| XI | cancel the whole Itinerary of a pnr |

PNR Retrieve

HE RT

| | |
|----------------------------------|--|
| RT | retrieve an active pnr |
| RT / SMITH | retrieve pnr by clients name |
| RT / SMITH * A | retrieve only the Active pnrs of a client using the name |
| RT <record locator> | retrieve pnr by record locator |

Similar Name List entries

| | |
|-------------|--|
| RT 3 | retrieve pnr on line 3 of the displayed list |
| RT 0 | return to previous similar name list |

7.**CANCEL AND REBOOK**

- ⊕ Increase / Decrease the number of seats requested before saving the pnr (during pnr creation)

If, during pnr creation, you have sold the wrong number of seats, you may correct the number before saving the pnr, using the following entry

| | | |
|--------------|----------------|---|
| 4 | / | 3 |
| Line number | correct number | |
| Of itinerary | of seats | |

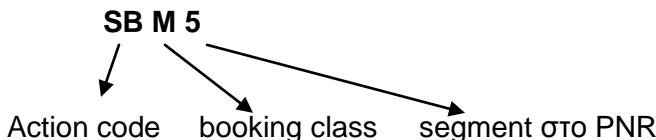

! Attention !

This command is not advised to be used for airlines requiring Direct Access availability.

- ⊕ Auto cancel and rebook for class of service & date before and after saving the pnr/end of transaction and redisplay it .

The “Should Be” entries are used to automatically resell segments, quickly without having to check the availability.

To change the booking class and/or the date, you may use the following entries:

| | |
|----------------------|--|
| SB 13DEC 5 | change date for segment 5 of the PNR |
| SB M 13DEC 5 | change booking class & date for segment 5 |
| SB C | change booking class for the entire itinerary |
| SBM3 / 12DEC4 | use multiple rebooking entries for class/date on specific segment in the pnr |

! Attention !

Always check that the Status Code of the rebooked segment(s) is DK or LK.

8.**PNR UPDATES**

| NM1PASSIAKOS/KMR(YTH) (IDDOB11SEP90) | “youth psgr” with additional ID DOB to display date of birth on the etkt image of the airline file. <i>(airline specific!)</i> |

 NAME CHANGE and UPDATE

Name change or update, can be processed without restrictions BEFORE the end of transaction (ET) with the following entries.

! Attention !

Changing or updating a name AFTER the end of transaction (ET) can be processed by following strictly the airlines' rules for name change.

All name changes or updates must be processed after getting an approval from the airline. In any other case the reservation might be canceled by the airline.

When the airline makes a name change directly in their system (Non Altea Airline), the name must be changed in your Amadeus Pnr, exactly as it appears on the airlines' system.

In case the response is "RESTRICTED FROM AIRLINE", then you must contact the Amadeus Helpdesk.

If the names are not exactly the same in both systems (Amadeus & Airline), then NO synchronisation will be amongst them. This means that you won't be able to receive messages sent by the airline and vice versa.

1/ ANDRE MR

change of the first name and title

NU 1/ ANNITA MRS

update of the first name and title

2/1 PAPAS/KMR

full name change
(when an approval from the airlineis is given)

NU 2/ 1ADAMS/KMR

full name update
(when an approval from the airlineis given)

! Attention !

When there is a name change in the pnr, all passenger associated SSRs are being cancelled automatically. When the name is updated, all passengers associated SSRs are automatically rebooked.

Add / change / update data in brackets for child or infant

 **OPTIONAL PNR ELEMENTS**

You may use the optional elements to enrich your client pnr providing more details regarding passengers' needs, when and if it is needed.

- Insert clients preferences like phone numbers, remarks, frequent flyer number etc
- Send an general information to the airlines
- Request specific services like a special meal on board, a wheelchair, a bicycle etc

AP –Advise Phone

HE AP

Insert contact details for your client like phone numbers, addresses, email. You may insert more than one of these elements.

AP 6977 989898 - M

mobile number of the passenger

AP 210 5555555 - H

home telephone number of the passenger

APE-helpdesk.gr@amadeus.com

passengers e-mail

AM / AB - Mail & Billing address

HE AM

Insert mailing & biling address

AM 157 SYGGROU AV,17121,NEA SMYRNI,ATHENS

mail adr.

AB AMADEUS HELLAS FINANCE DPT,157SYGGROU AV,17121,ATHENS

billing adr.

RM - Remark

Notes and remarks that you may save in the pnr. You may insert more than one remark element. RM is visible by all the System User Airlines involved in the pnr contrary to the RC element that can only be displayed by the users in the office ID that has created the RC.

RM PASSENGER WILL PAY BY CREDIT CARD**RC PASSENGER IS VERY DEMANDING GIVE DETAILED RECEIPT**

FFN – Frequent Flyer

Insert the frequent flyer card of the passenger. The Frequent Flyer Card is personal and belongs to the specific airline.

The command consists of: (a) action code (b) airline code (c) card number

FFN AZ – 1122112

FFN OA – 23232321 / P1

with Passenger Association

FFN LH – 99900001 , A3

the FF card belongs to LH but the reservation is on A3 (FFN Interline)

- There are some airlines that require SSR format to enter the Frequent Flyer Card

SR FQTV A3 – A322112 / P1

OP – Option element

“Review” the pnr on a future date for a specific reason. You may add multiple option elements as long as they are set on a different date. Pnr will be placed in the default queue Q/3 on the date that is set.

OP 21SEP / CALL CLIENT TO RECONFIRM RESERVATION

↓ ↓ ↓
action date free flow text
code

OP25SEP / CHECK IF VISA HAS BEEN GRANTED

ST – Seat request

- Ability to request a specific type of seat in the aircraft (window – aisle).

Aisle request:

ST / NA

ST / NSSA / P1

for a specific passenger

Window request:

**ST / NW
ST / NSSW / P1 / S4**

for a specific passenger & specific segment

- + Ability to request a specific seat in the aircraft “preseating”.
- The response from the system may vary depending on the airline (Command page or GUI)
- Display the seat map of the plane
 - Request the seat of your choice (Command page / GUI)

Choose simply and easily your preferred seat with a "click".

 Amadeus Ancillary Services / Chargeable Advance Seat Request
Chargeable Advance Seat Request, chargeable preseating, for airlines supporting the Interactive Seat Map.

With this new function, Amadeus Ancillary Services, the passenger has the possibility to purchase, along with the ticket, an "on demand" service offered by the airline.

The airline decides if there is a charge, what is this charge and how it is set.

The request is made with the entries that are mentioned above.

The chargeable service appears with a slash **/** at the beginning

Manually entered Ticket Number

Airlines have created an automated way to check and identify the automated electronic ticket number, in their systems. Due to this automation it is mandatory for the electronic ticket number to be inserted in the pnr/system with a certain format for each airline (OSI or SSR). The FA element is created automatically upon ticket issuance and sends the ticket number to the airlines in the respective way.

Inserting a ticket number manually is FORBIDDEN by the airlines!!!

- There are very few exceptions when an e-ticket nr. can be manually inserted in the booking.

One of these cases is a change of routing in the itinerary. When segments are removed and rebooked, the FA element is automatically canceled. So the ticket number has to be inserted again to match the specific segment, because the airlines' system might cancel either the segment or even the whole itinerary if there is no matching ticket number for all segments.

In this case, the airline has to support the function "Ticket Number Transmission". To check if the airline supports this function, you can go to the information page GGPCA<airline code>, where all the possibilities offered by the airline through Amadeus, are displayed. If the "Ticket Number Transmission" is set to ALL, then you are able to insert the ticket manually with the FH entry:

FHE 220 – 9546789010 /P1 /S3-4

It is mandatory to associate the FH element to passenger and segment(s), even if there is only one passenger in the pnr.

! Attention !

Contact the airlines or the Amadeus Help Desk for the correct use.

O.S.I. - Other Service Information

You may use the OSI element to simply send additional information to the airlines. With this element you do not request a special service from the airline, thus NO confirmation from the airline is required.

OS YY PLS NOTE VIP GM OF NATIONAL BANK

↓ ↓ ↓
action airline code free text
(YY for more than one airline)

Example :

OSA3 TCP 5 WITH RLOC YYMMZZ

TCP - The Complete Party

OSAA FULL PSGR NAME IS SMITH ALFONSO MARTIN MR

OSBA PSGR CTC IN BANGKOK HILTON HOTEL

S.S.R. - Special Service Request

This element is used to request a special service request from the airline. This request can be for a wheelchair, a stretcher, an unaccompanied minor, a special meal etc.

- All the services have a special 4-letter IATA code.
- For any other service you might need and there is no 4-letter IATA code, you may use the code OTHS. All these service requests send a “Teletype Queue Message” to the airline concerned that will confirm or reject your request by sending the answer to a specific Queue of your agency.
- Chargeable Ancillary services.
The airline decides if Chargeable Ancillary Services will apply, what the cost will be and how it will be defined and processed.

HE SSR → MS 484

list of all SSRs Codes with explanation.

HE MEAL CODES → MS 22

list of all meal codes - SPECIAL MEALS.

- **Basic entry NO free text required :**

SR VGML

special request 4-letter IATA SSR code (vegetarian meal)

- Basic entry free text required :

SR SPML - PLS SERVE SCHRIMPS

In case the service request doesn't concern all the passengers in the pnr, or does not apply to all itinerary segments, you have to passenger and/or segment associate the SSR.

SR BIKE / P3

SR WCHS – ELDERLY PAX /P2 /S3-4

- General SSR request :

AMADEUS E – MAIL

The Amadeus Email function gives you the ability to send by e-mail, either the pnr that you have created in Amadeus or simple messages, without having an e-mail account in the specific terminal.

The first time that you will want to use the Amadeus E-mail, you will have to perform the activation entry:

WM/

Send Itinerary

IEP – EML- helpdesk.ath.gr@amadeus.com

send the itinerary by e-mail

The e-mail received is realized through the Amadeus website www.checkmytrip.com with additional graphical features that enrich the display. You may find the link at the end of the e-mail.

The passengers can access the www.checkmytrip.com as well, simply by inputting the Amadeus reservation code and the Family name.

Send Free Text

WMP (CR)
EML <e-mail address> (CR)
ENTER YOUR TEXT HERE (CR)
ENTER YOUR TEXT HERE (CR)
LLLL/SEND

*The indication (**CR**) stands for the use of the keys <Ctrl + enter> that are used to change row in your message*

Send almost any screen display to an E-MAIL address

WM/FWD/EML <e-mail address>/ <Amadeus entry>

e.g.

WM/FWD/EML annjournal@btb.com/TNATHLON/ABA

11.**PNR REPLICATION**
 Ability to replicate a pnr

The system can replicate the elements of an active pnr by checking, whenever applicable, the Availability.

A new pnr is created without canceling or modifying the original pnr.

RRA

replicate pnr with AXR association

Use **RTAXR** to display the list of associated PNRs and navigate between them.

RRN

replicate pnr with no AXR association

RRN/2

replicate pnr for 2 seats

RRI

replicate itinerary only

RRP/P1-3

replicate passenger data only

! Attention !

Be careful to avoid Dupe bookings.

Always check the Status Codes of the replicated segments to be DK or LK.

12.**PNR HISTORY**
 Ability to display the PNR history.
RH

display the entire history of the pnr

RHA

history of air segments

RHG

history of osi/ssr

RHQ

history of queues

ETK

End of Transaction – K confirm

ERK

End of transaction – Redisplay pnr – K confirm

14.**NON HOMOGENEOUS PNR**
 Create a non- homogenous PNR

During a PNR creation, you may book different routings/segments for your passengers, avoiding the creation of two different PNRs!

After the End of Transaction (ET , ER) the system will split the passengers and the itinerary accordingly , into two different independent PNRs.

- ✓ Follow the example below showing the required process step by step:

« Two business partners wish to travel together from ATH to PAR on 11DEC on the first flight on OA . The first one will return the next day while the second one will return 3 days later »

Step 1 Book every segment in the requested number of seats.

Step 2 enter all the mandatory elements in the PNR

Step 3 At the end of transaction (ET – ER) the system will return the message "NEED PASSENGER ASSOCIATION".

system response :

| | |
|---|--------------------|

17.

CLAIM PNR

When a reservation has been created directly to the airlines'system, but you have to issue the ticket for the passenger, you may follow the Claim procedure for the airlines that support this function.

The Claim pnr function allows you to get full control over an active reservation that has been made directly to the airlines system and issue a ticket, with no fear of a dupe reservation.

Consult the page of the referred airline **GGPCA <..YY..>** to check if you can proceed with a pnr claim.

```

18.

PASSIVE BOOKING

When a reservation has been created directly to the airlines'system, but you have to issue the ticket for the passenger, you may follow the Passive pnr procedure for the airlines that allow this function and restrict Claim request.

It is important to remember that a passive reservation is *not active* and is only used to issue tickets. For any further changes or updates (OSI – SSR- FFN) you must contact the airline directly.

Consult the page of the referred airline **GGPCA <..YY..>** to check if you can proceed with a passive booking.

```

! Attention !

During the creation of a passive booking PK, your reservation must be identical to the active one that is created by the airline. If the reservation has the slightest difference (eg. on the name or date), the booking will be rejected returning NO status = NO action taken.

⊕ To create a **PK** reservation, you must insert the segments either **(A)** with a sell entry from the Availability with the airlines' record locator or **(B)** with a Direct sell entry including the airlines' record locator

- ✓ Follow the 2 step procedure described below :

| | | | |
|---------------|-------------------------------|----------------|------------|
| Step 1 | SS 2 Y 1 / PK / XXZZYY | passive action | (A) |
|---------------|-------------------------------|----------------|------------|

↓

| | |
|---|------------|
| SS AZ717Y23MARATHMXP PK 2 / XXZZYY | (B) |
|---|------------|

*** Include the mandatory elements to complete an Amadeus pnr : NM / AP / OS / TK ***

| | | |
|---------------|-----------|--------------------|
| Step 2 | ET | end of transaction |
|---------------|-----------|--------------------|

19.

PNR SECURITY ACCESS

Ability to allow another Amadeus office to access your pnr, by using the following procedure:

- **ES ATHGRxxxx - R** give access of your pnr to another Amadeus agency
ES ATHGRxxxx - B (ATHGRXXXX is the Amadeus Office-id of the cooperating office) for **R** (Read only rights) or **B** (Read & Write rights)
- **QE/ATHGRxxxx/0** places the PNR in Queue 0 of the cooperating office

At any time you may cancel the extend security access on the pnr from the cooperating office, by using the entry **ESX**.

20.**QUEUES**

Amadeus Queues can be seen as an electronic storage area in which messages and reservations are placed mainly from the airlines.

Queues are the only channel of communication between the airlines and the travel agents.

QT

Queue Total

display only the active Queues that contain active pnrs or messages

```

..... 5. 6. 0. 1
*TRN*
```

 Process an active QUEUE

QS 1 C0 D4

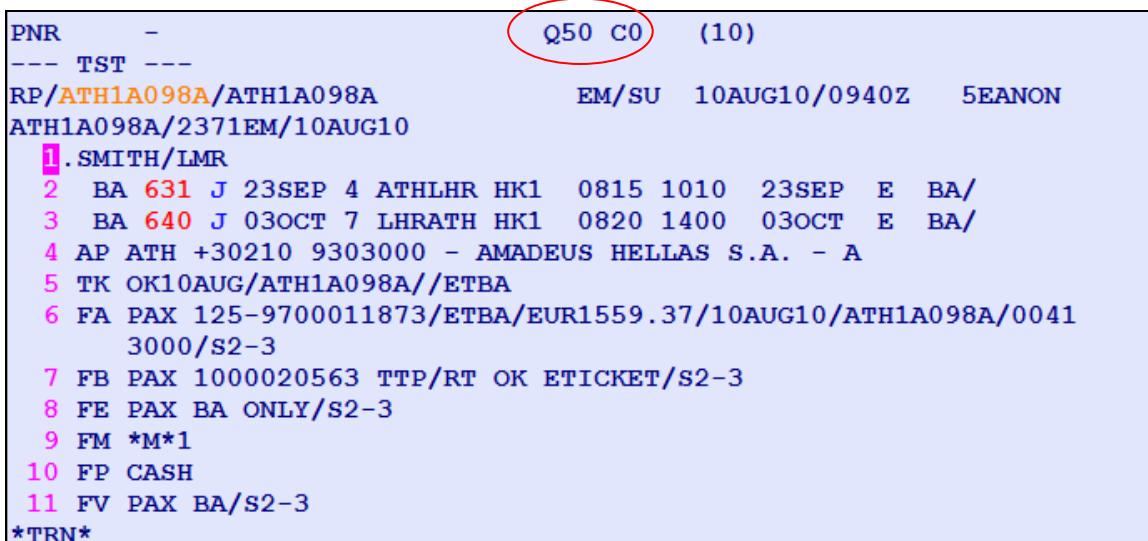

'enter' Queue 1, category C0D4

To start proccesing a Queue, can be done quickly and easily by using the speed mode of Amadeus, simply with a "double click" on the desired highlighted Queue category.

The screenshot shows a command-line interface for Amadeus. A specific line of text is highlighted with a pink rectangle: 'Q 3.OPTION C 0 1. 234. 0. 233'. An arrow points from the text above to this highlighted area.

 Working the pnr in a QUEUE

The screenshot shows a PNR record. The queue category 'Q50 C0 (10)' is circled in red. The PNR details include: RP/ATH1A098A/ATH1A098A, ATH1A098A/2371EM/10AUG10, and various flight segments and passenger information.

➤ Actions :

IG

save the PNR in the Queue and display the next, with no prior action

or

QD

< save in Q and show me the next >

QN

remove the current pnr from the Queue and display the next, with no prior action

< remove from Q and show me the next >

| | |
|--|---|
| ET | save changes in a pnr after working in it, and display the next |
| < save changes in pnr, remove from Q and show me the next> | |
| QI | save the pnr in the Queue and EXIT the queue mode, with no prior action |
| < save in Q and EXIT Queue > | |
| QF | save changes in a pnr, remove the current pnr from the Queue and EXIT the queue mode. |
| < save changes in pnr, remove from Q and EXIT Queue > | |

 **Activate a new Queue**

You may activate your own personal queue in system where you may place the pnrs that you are working on so you can check them later. Also you may organize your work load by defining a queue for a specific function.

e.g. you may define a specific queue as "PDG SSR" and place in it all the PNRs that are pending the response from the airline, so you can check them later.

- ✓ Follow the 3 step procedure that is described below :

| | |
|-----------------------|---|
| QTQ | display all active Queues so you can check which are available and can be used by you |
| QA 42C2 | activate eg Queue no 42 with 2 categories system response will be "Queue activated" |
| QAQ 42 PDG SSR | name the Queue eg. PN SSR |

- ⊕ Manually place a pnr in a Queue - QE <queue number>

QE 42

place the PNR in a Queue of your office

QE / ATHGR1111 / 45

place the PNR in a Queue of a cooperating office

- ⊕ Usage of « MESSAGE QUEUE- 97 »

Except from the pnr Queues, Amadeus allows you to create and send written messages in queue 97 of your office or a cooperating office.

- ✓ Follow the example below, with the required procedure step by step:

« Communication with the Amadeus H/D through the Message Queue »

| | |
|------------------------------------|------|
| QE / ATH1A098A / 97 | (CR) |
| ATTN HELP DESK. FROM STAR TRAVEL. | (CR) |
| PLEASE CHECK PNR YE445S AND ADVISE | (CR) |
| WHY THERE IS NO RL FROM AIRLINE | (CR) |
| THANK U // | |

- The indication (CR) suggests the use of keys < **Ctrl + enter** > to change a row
- ATH1A098A , the Amadeus office ID
- Complete the message with 2 slashes //
- If the message is sent correctly, it will reappear on your screen along with the date and time

21.

FARE QUOTE DISPLAY

With the Fare Quote Display you may request a list of applicable fares of an airline for a city pair, without the taxes (Carrier Code Fares)

The basic entry of an FQD consists of:

- (a) city pair
- (b) departure date
- (c) airline

FQD FRAMNL /ALH /D11SEP

```

23. INFORMATIVE PRICING / FQP - Fare Quote Planner

HE FQP

With the FQP entry you may request an informative pricing for an itinerary with no previous reservation

- The FQP pricing includes taxes.
- Use airport city codes, when applicable, to correctly calculate the fares and the taxes.
- The FQP command consists of the horizontal recording of the city pairs, among which, the date, the airline and the class of service are stated.

ITINERARY PRICING

HE FXP

Price the itinerary and automatically store the fare by creating the relevant TST.

- Automatic pricing – **FXP** - , the fare returned by the system is guaranteed.
- Automatic selection of Validating Carrier.
- Automatic check of fare rule restrictions,ticketing agreement tables and BSP GR table “Ticket Ability Precheck”.

There are three possible system responses at time of pnr pricing for the created pnr :

action code:

system response:

Case 1

FXP

automatic & applicable pricing of itinerary
&
TST creation

Case 2

FXP

display a list of applicable fares for the specific itinerary

Case 3

FXP

no applicable fares for the specific itinerary.

In detail:

Case 1

FXP

automatic & applicable pricing of itinerary
&
TST creation

```

In this case, the itinerary is not automatically priced. No applicable fares were found to match the itinerary because eg. the class of service booked, is incorrect.

The system displays a list of fares that qualify for pricing, based on the FQD but without checking the Availability.

Correct your reservation, with the help of the system, so that the next pricing will be automated and guaranteed (Case 1) using one of the following 3 ways:

 **FXP** options

| | |
|----------------------|--|
| FXP | basic entry – Price the itinerary and automatically create a TST |
| FXX | price the itinerary without creating TST Informative Pricing |
| FXP/R, VC- xx | price the itinerary and automatically create a TST, choosing a different Validating Carrier than the one suggested by the system . |

❖ Passenger / Segment

| | |
|--------------------------|---|
| FXP / PAX | adult pricing |
| FXP / INF | infant pricing |
| FXP / P1 | specific passenger e.g. P1 |
| FXP / S3 | specific segment e.g.S3 |
| FXP / P1-2 / S3,5 | combine passenger and segment selection |

❖ Other PTC – passenger type code

| | |
|----------------------|--|
| FXP / RCH | discounted child fare (child 5-11years old) |
| FXP / RC04 | discounted child fare (child 2-4years old) |
| FXP / RU09 | fare for an unaccompanied minor when a charge applies from the airline (Um 9 years old) <i>(airline specific !!!)</i> |
| FXP / RSEA | discounted seaman fare (<i>airline specific !</i>) |
| FXP / RSD | discounted student fare |
| FXP / RZZ | discounted youth fare |
| FXP / CMA*CMP | companion fares (<i>airline specific !!!</i>) |

❖ Nego / Uni / Privates fares

FXP / R, U

basic Nego / Uni / Private fare quote
(*airline specific !!!*)

FXP / R, UP

combination of Uni & Published fares
(*airline specific !!!*)

! Attention !

The entries to price the Nego / Uni / Private fares are ONLY given by the airlines

❖ Airline Service Fees ((*airline specific !!!*))

The Airline Service Fees, also known as **OB fees**, are defined and collected by the airline that implements them and are charged to the customer at his first ticket issuance.
They may concern fees regarding Form of Payment, other Ticketing Services or extra Service Requests.

Use the following entry to price a booking with Credit Card fee when this is implemented by the airline and only if the fee is not automatically included in the normal FXP entry and only when Form of Payment is not entered previously in the booking :

FXP / R,FA – OB FCA

pricing including the OB fee charge by using the generic code for credit card

! Attention !

For detailed information regarding OB Fees please refer to "Amadeus Airline Service Fees" manual.

❖ Override fare quote entries

FXP / R,ET-GR

specific tax exemption
Exempt Tax - GR

FXP / R,DO-OBD

override booking date

FXP / R,MNL,FS-EUR

override point of sale and display all fares in EUR

| | |
|---|--|
| FXP / L – KHEE1M | force pricing by a specific fare basis for the whole itinerary |
| FXP / S2 , 3 / L2 - YLRT / L3 – KLRT | force pricing by a specific fare basis per segment |

! Attention !

When using the override entries, the pricing is no longer considered guaranteed.

❖ Amadeus Ancillary Services

The Chargeable Ancillary Services are split into two categories:

- A. **Chargeable Ancillary Services** , based on the SSRs
- B. **Chargeable Advance Seat Request**, (only for the airlines using the interactive seat map).

| | |
|-----------------------|---|
| FXH | informative pricing, no TSM creation |
| FXG | confirmed pricing, with TSM creation |
| FXG / S3 | price the ancillary services that are associated to segment 3 |
| FXG / C- VGML | price only the ancillary services with the code VGML |
| FXG /L2,4 / OD | one common pricing (origin-destination) for lines 2 & 4 |

Best Pricing Entries :

Use the Best Pricing Entries for quick and automated pricing of an itinerary

With Amadeus Best Pricing Entries the following checks are being processed:

- FQD check
- Availability check
- Automatic cancelation and rebooking of segments

➤ List of lower available applicable fares

Choose the desired fare

Automatically cancel and rebook
to the price selected from the previous list

FXA

| FXA | | | | | | | | | | | |
|------------|------------|---|------|---|------|---|-----------|-----|-----|----|--|
| * | FARE BASIS | * | DISC | * | PSGR | * | FARE<EUR> | * | MSG | *T | |
| 01 | CIF | * | | * | P1 | * | 1823.40 | * | | *Y | |
| 02 | J2FLBA | * | | * | P1 | * | 1596.40 | *SR | | *Y | |
| 03 | Y2FLBA | * | | * | P1 | * | 1170.04 | * | | *Y | |

FXU 2

- Automatic cancellation and rebooking in the booking classes of the lowest available fare.
(with names and TSTcreation)

FXB

- Automatic cancelation and rebooking in the booking classes of the lowest available fare
(without names and TST creation)

FXR

- Find the lowest fare regardless of availability – Informative pricing

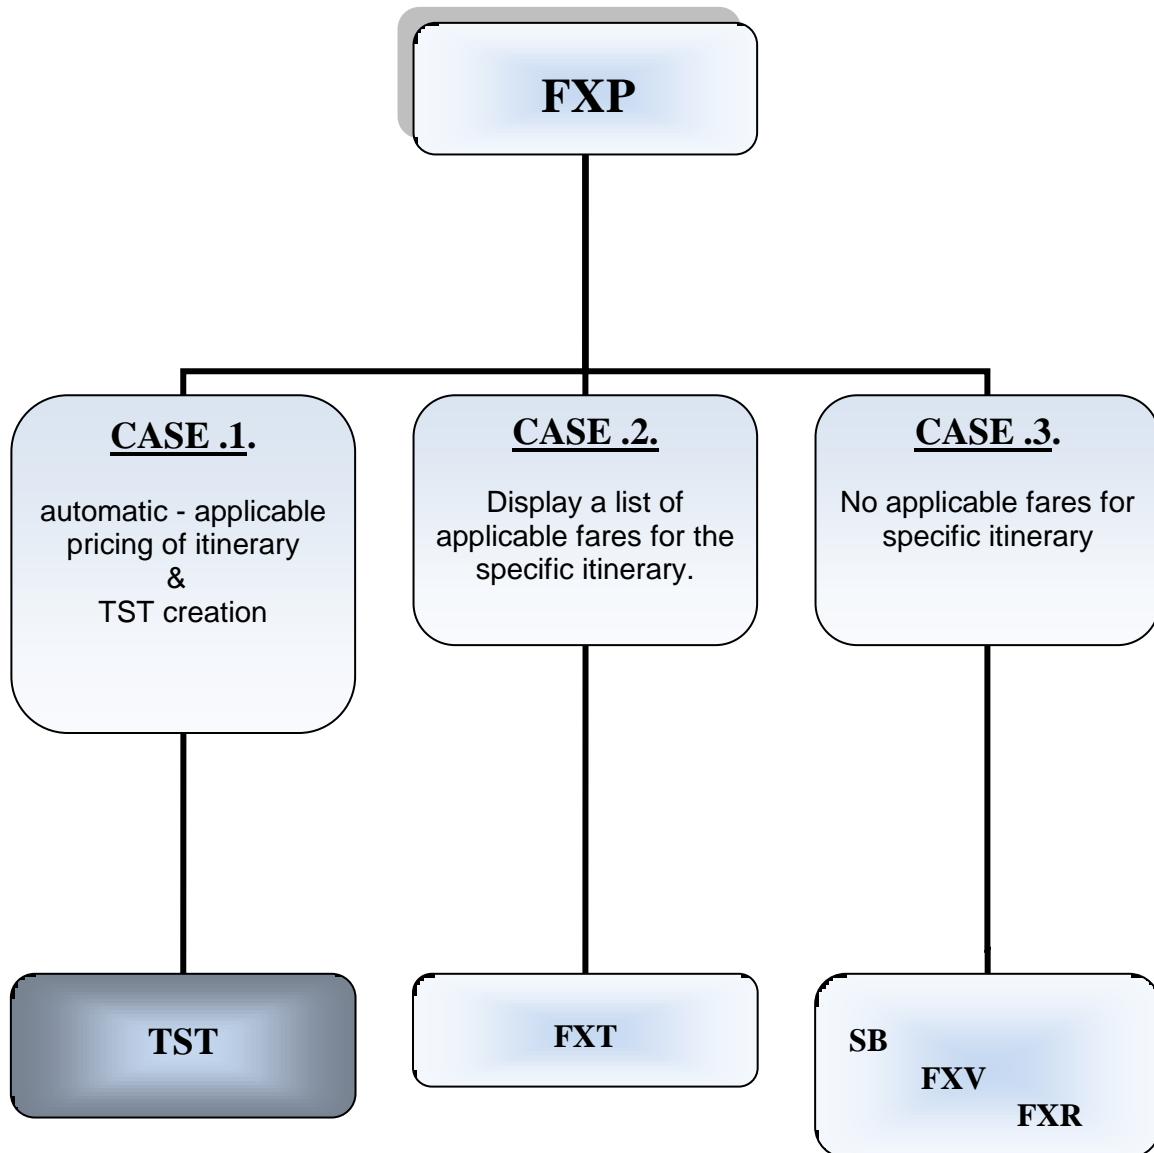

In case the booking classes are available, then the message displayed will be «Lowest fare is available». In case the booking classes are not available, then the message displayed will be «Lowest sold out – Try Waitlist»

FXL

! Attention !

Before storing the price with ER/ET make sure the status returned in the itinerary is guarantee, after the cancelation and rebooking process !!!!

Chart flow:

25.**TST – TRANSITIONAL STORED TICKET**

- ⊕ The Transitional Stored Ticket – TST can be created with two different ways:

- By automatically pricing the itinerary – FXP -
- By creating/updating a fare manually – «manual ticket MASK».

The difference between these two types of pricing, is the procedure followed and the “guarantee” of the fare. In case of an automatic pricing –FXP-, the fare is guaranteed but when a TST is updated manually, the fare is not considered to be guaranteed.

- ⊕ The TST remains active for issuance only on the same day of its creation.

- ⊕ Display the TST after pnr pricing.

Basic entry : **TQT**

➤ TQT options

TQT / T1

display TST record 1

TQT / P1

display TST record for passenger 1

TQT / S7

display TST record for segment 7

- ⊕ Delete a TST.

Basic entry: **TTE**

➤ TTE options

TTE / T 2-3,6

delete specific TSTs

TTE / P1

delete TST for specific passenger

TTE / INF

delete all TSTs for infants

TTE / ALL

delete all TSTs

- ⊕ When no active TSTs exists ,then the following system response applies :

➤ TQT

NO ACTIVE TST - DELETED TST RECORDS MAY EXIST - PLEASE USE TTH

In order to display the TST index with all active and deleted TSTs, the entry is

TTH / ALL

The deleted TST record, remains in store as a "Deleted item" that you may redisplay it with the following commands:

TTH / T4 specific TST record

Examples of system responses:

✓ **TQT** (GUI)

The screenshot shows the TST -- Webpage Dialog window. At the top, there's a toolbar with icons for file operations. Below it is a menu bar with 'TST' selected. The main area has several tabs: 'Check country taxes', 'Flight segments', 'Fare calculation', 'Commission', 'Form of payment', 'Endorsements / restrictions', 'Payment restrictions', and 'Original issue/in exchange'. The 'Flight segments' tab is active, displaying two flight segments:

| # | Stop. | City | Carrier | Flight | Class | Date | Time | Status | Fare basis | TKT desig. | NVB | NVA | Baggage |
|---|-------|------|---------|--------|-------|-------|-------|--------|------------|------------|-----|-----|---------|
| 1 | O | ATH | BA | 631 | Y | 11JAN | 09:00 | OK | Y2FLBA | | | | 1PC |
| 2 | O | LHR | BA | 634 | Y | 19JAN | 18:50 | OK | Y2FLBA | | | | 1PC |

 Below the segments, fare details are listed:

| Base fare EUR | 1027.00 | Normal issue(F) |
|---------------|---------|-----------------|
| Equivalent | | Banker's rate |
| Taxes EUR | 118.04 | (button) |
| Airline Fees | | (button) |
| Total EUR | 1145.04 | Net fare |

 At the bottom of the window are several buttons: Update, Update segments, Delete, Exchange, Service fee, and Create MCO.
